

Key Benefits

No Training Required

SIMON eliminates the need for your organization to train personnel in the numerous technologies required for accurate access reporting. These include directories and file systems, SAP Crystal Reports, SQL Server, Windows scripting, NetVision solutions, and more.

Reduced Cost

SIMON reduces the cost of solution ownership. On-call experts are ready to efficiently apply patches, provide updates, manage policies, and build reports.

Reduced Effort

Handing off the workload to SIMON enables your team to focus on critical business challenges, including analysis and response of NetVision report information.

Improved Policies

SIMON provides industry best-practices and knowledge, ensuring that you have the most effective policies in place for your business needs.

Improved Reports

SIMON delivers new report templates as soon as they're available and customizes reports based on your specific requirements.

Managed. *Ownership made easy.*

NetVision's managed service ensures that you're getting the most out of its industry leading solutions for access rights reporting and monitoring – with the least amount of cost and effort. SIMON was designed to reduce cost while improving your results.

A few of SIMON's invaluable features include:

- ✓ Virtually Touchless Deployment
- ✓ Lower Cost vs. Traditional Software Mgt.
- ✓ Zero Configuration & Administration
- ✓ No Pre-Requisite Knowledge, Expertise, or Training Required
- ✓ Data Stays Securely On-Site
- ✓ System is Unaffected by Staff Changes
- ✓ Best-Practice Policies and Reports are Pre-Configure

SIMON pushes outstanding technical support to the next level. In addition to typical upgrades and maintenance, SIMON assures that you're getting the optimal return on your investment.

Ensured Results

SIMON ensures results through superior management of policies and reports. Automatic updates over time maintain a trusted state of best-practice reporting for access audit.
